

Established in 1867 by Albert Dimond, Dimond Bros. mission is to offer sound insurance coverage to the hardworking people in our community. Our small staff of two in 1867 has grown to a service minded, highly professional group of over 300 associates. In 1999, Dimond Bros. began growing through mergers and acquisitions, bringing services to 40+ offices throughout Illinois, Indiana and Wisconsin. Foundry exposures have been core knowledge of our Carmel office for the last 25 years. While most agencies are in and out of the foundry market, the long-term approach has yielded consistent growth and retention. Strong insurance programs are structured for clients, as well as equally strong relationships with clients. These results have not gone unnoticed by the insurance carriers. Unique to the Dimond Bros. team's knowledge base, carriers have changed how they rate liability- net tonnage, not sales. This more accurately reflects a foundry's exposure.

In 2017 a program was introduced exclusively to members of INCMA, and available only through our agency for workers compensation. In partnership with a carrier rated "Excellent" by AM Best we have built a dividend program for members. A portion of the program profits are returned to INCMA member participants once program thresholds are met. Dimond Bros. is honored to partner with INCMA.
